EDUCATION

G.H. Patel College of Engineering and Technology (GCET), Anand
Bachelor of Technology (B.Tech.) in Information Technology

2022–2026
GPA: 7.32 / 10

EXPERIENCE

Full Stack Developer Intern — Agevole Innovation Pvt. Ltd.

Jan 2026 – Jun 2026

- Built and deployed MERN stack applications using React.js, Node.js, Express.js, MongoDB, REST APIs, JWT authentication, RBAC, CRUD operations, responsive UI, and reusable components.
- Optimized MongoDB queries, fixed production bugs, tested features, collaborated through Git/GitHub, and participated in code reviews, deployments, and Agile development.

PROJECTS

Newsbit – *Python, FastAPI, PostgreSQL, SQLAlchemy, Next.js, LLMs*

 [Live](#)  [GitHub](#)

- Built an AI news platform with tool calling, metadata-first retrieval, and hybrid search for structured and semantic queries.
- Implemented entity extraction, asynchronous background jobs, and metadata indexing for scalable retrieval.
- Designed and benchmarked a hybrid retrieval pipeline combining metadata, knowledge graph expansion, and vector search to improve retrieval quality while reducing unnecessary LLM calls.

PromptX – *Node.js, Express.js, PostgreSQL, MongoDB, BullMQ, Docker*

 [Live](#)  [GitHub](#)

- Built a production-ready AI prompt platform with modular backend architecture, scalable API design, asynchronous AI job processing, and 10+ REST APIs.
- Implemented JWT authentication, refresh tokens, Redis caching, centralized error handling, and queue-based background workers, reducing protected route response times from nearly 3s to around 5ms.
- Integrated Docker, GitHub Actions CI/CD, Pino logging, rate limiting, PostgreSQL workflows, and tested 5+ critical APIs using Jest and Supertest to ensure reliable deployments and edge-case handling.

StyleNest – *Node.js, Express.js, MongoDB, Redis, React, Razorpay*

 [Live](#)  [GitHub](#)

- Built a full-stack e-commerce platform with product, cart, checkout, admin workflows, and 5+ REST APIs.
- Integrated Razorpay payments, Cloudinary storage, RBAC-based admin controls, managed 50+ products with inventory updates, and tested critical checkout and payment workflows.
- Improved product and order API performance using Redis caching, reducing response times from nearly 3s to around 7ms.

SKILLS

Languages	JavaScript, TypeScript, Python, C++, SQL
Backend	Node.js, Express.js, FastAPI, SQLAlchemy, REST APIs
AI	LLMs, RAG, LangChain, LangGraph, MCP, Vector DBs
Testing	Jest, Supertest, API Testing
DevOps	Docker, GitHub Actions, AWS, CI/CD
Frontend	React.js, Next.js, Tailwind CSS
Databases	PostgreSQL, MongoDB, MySQL, Redis, pgvector
Core CS	DSA, DBMS, OOP, OS
